

BCRC Transportation Report for 5-7-2008

The RIMD (road maintenance and improvement district) presentation held in Cottonwood in early April was well attended by residents of our area who asked many good questions. Further information is available from Bev Staddon, Special Districts Coordinator at Bev.Staddon@co.yavapai.az.us or from the transportation committee. Ivo Buddeke, the Montezuma Estates POA representative, has offered to make a 15-minute presentation at a future council meeting covering information on easements, right-of-way, and related topics.

At the last transportation committee meeting, member Maggie Holt led a discussion on possible transportation items for the Beaver Creek Plan survey. She has shared this information with the community plan committee. We also finished commenting on possible improvements for the Well Road.

The next transportation committee meeting will be on **Wednesday, May 14th, at 5 PM in the Adult Center**. We will finalize the Well Road report to send to the Council and get feedback from Maggie Holt about survey items. Also we will study information on PARAs, Planning Assistance for Rural Areas. This is a program sponsored by ADOT with is 100% funded. It can be used to address planning issues related to roadway and non-motorized transportation modes. We should be able to make a short presentation to the Council at the June meeting. Participants will need to complete some reading homework about PARAs located at <http://tpd.azdot.gov/planning/PARAs.php> prior to the meeting.
