

## LMPOA Transportation Report, May 2009

### UPDATE (see April)--Wheelchair Lift-equipped Passenger Van Grant

The NACOG selection panel has ranked the BCAC/LMPOA grant application #2 out of the 20 applicants from our 4 state region. These recommendations have been forwarded to ADOT and are awaiting additional information on program funding levels. ADOT anticipates notification of successful applicants in early June.

### UPDATE (see April)--Montezuma Lake Rd Switchbacks and Pedestrian Bridge across Wet Beaver Creek

Supervisor Davis discussed this LMPOA request at his staff meeting on April 21. The response was that “at this time, the County does not have the funds to pursue a Transportation Enhancement Grant”. Since this is a reimbursable grant, costs involved are generally small, so we will ask for clarification, reconsideration, and how we can help to move this project forward. LMPOA has committed to providing the funds match required for the grant, so that is not an issue.

### UPDATE (see April)--Economic Recovery Fund Projects

The list was discussed and approved at the NACOG Technical Subcommittee April 8 and now reflects the dollar amounts to fit the funding, plus modified the Clarkdale projects to be individual rankings instead of 3A and 3B. The Cornville project is estimated to be about \$946,000, which is more than the \$788,542 provided for in the Recovery Act and allocated to the Verde Valley portion of Yavapai County. However, there is also \$422,500 of existing Federal Money in the current NACOG TIP (FY 2010) that can be used (*Plus a match requirement of \$24, 083 to bring that money to a total of \$446,583*). This makes the funding available for use (*including the match requirement on the existing local government construction money*) on the Cornville Cold in-place recycle project to \$1,235,125.

## LMPOA Transportation Report, April 2009

### McGuireville Interchange

Those motorists traveling I-17 are reminded that the speed limit has been reduced to 45-55 MPH in both directions. Many drivers are not observing this limit, thus making that area hazardous due to curves in the road near the interchange. Also be aware that there is a stop sign prior to entering the northbound lane of I-17 from McGuireville. Please be alert and cautious near all the construction.

The north bound deck demolition is moving forward very well. The shoulder portion of the north bound bridge deck was successfully removed on 4/1. Earthwork is ongoing throughout the project zone; the new on/off ramps are being constructed. The northbound bridge concrete is complete, and the girders that will span the new bridge are being fabricated.

### Potholes

There are many potholes that need to be repaired. These are being filled, but there is a back log of requests at this time. To report potholes or find out if one has been assigned a work order number, call 567-7732. The pothole at the entrance to Montezuma Square, per request, has been called in as have others that have been reported to the committee.

### Truck Alert

Trucks over 50 feet in length are prohibited from driving on State Route 89A in the Mingus Mountain area. This applies to southbound traffic beginning at milepost 349 in Clarkdale.

### Economic Recovery Fund Projects

The Verde Valley portion of Yavapai County is expected to receive about \$780,000 for road stimulus projects. Any project(s) chosen must be on a federal-aid eligible route and shovel ready. The projects recommended by the Board of Supervisors by priority are:

Agency	Location	Description	Estimated Cost	Scope of Work	Status
--------	----------	-------------	----------------	---------------	--------

1. Yavapai County Government	Cornville Road – Aspaas to Beaverhead Flat (3.8 miles)	Cold in place recycle reconstruction	\$823,010	Cold in place recycle reconstruction	Meets criteria
2. City of Cottonwood	S. 6 <sup>th</sup> Street; SR89A to Mingus Avenue	Pavement Replacement	\$780,000	Remove and replace pavement on 2-lane, collector street	Meets criteria.
3. Town of Clarkdale	Broadway Road from the Town boundary with the City of Cottonwood North to the intersection at Tuzigoot Road	Mill and overlay approx. 1.33 miles of major collector road	\$493,350	Pavement preservation, 2” full mill and replace with ACFC	Meets criteria
	Main Street at Ninth Street Intersection N. to Broadway Road	Mill and overlay approx. 0.8 miles of major collector road	\$310,750	Pavement preservation, 2” full mill and replace with ACFC	Meets criteria

There were no shovel ready projects in our area on the eligible routes. The reconstruction and overlay of Montezuma Lake Rd from the “Y” to the bridge has been delayed twice and was recently removed from the Yavapai County 5-year regional road plan. The transportation committee has requested that a “shovel ready” plan be prepared now in preparation for a second round of stimulus projects.

#### **Montezuma Lake Rd Switchbacks and Pedestrian Bridge across Wet Beaver Creek**

On March 19 LMPOA requested that Yavapai County apply for a Transportation Enhancement (TE) grant in order to alleviate the unsafe situation for pedestrians, bicycle riders, motor vehicle drivers, and other users on Sycamore Bridge and on Montezuma Lake Rd north of the bridge. LMPOA would provide the 5.7% match for a project costing up to \$200,000. The issues are that Sycamore Bridge is the only egress from the most heavily populated part of Lake Montezuma where about half of the Beaver Creek area residents live, the bridge has no shoulder space for use by pedestrians and other non-motorized users, and Montezuma Lake Rd, connecting with the north side of the bridge, has no shoulders through much of a dangerous slope known as “the switchbacks”.

#### **Wheelchair Lift-equipped Passenger Van Grant**

BCAC in collaboration with LMPOA submitted a 5310 grant application to NACOG in early March. The joint transportation committee BCAC/LMPOA met the NACOG panel on March 31<sup>st</sup> to answer questions about the application. The application appeared to be well received by the panel, but there are many other applicants. NACOG will announce the recommendations for award of vans in June.

#### **Regional Projects**

**Camp Verde**-The Finney Flat sidewalks grant is progressing slowly.

**SR 260-On Western Drive to 89A** a pavement preservation project is beginning that will take 6 to 8 weeks. This work will be done mostly at night. The **Cherry Rd** safety improvements will start in the next 6 weeks and include a signal at Cherry Rd, improvements to the old SR 279 intersection with Horseshoe Bend and a left-turn lane will be added at Dickison Circle. Work will continue until spring of 2010.

**Cement Plant Rd**-The 5 roundabouts and road work are almost completed.

**Cordes Junction TI**-This is a \$50 million project with a diamond configuration, free flowing ramp, and two roundabouts. Will start this year.

**Sedona**-The traffic light installation at Airport Rd and 89A will begin in August. Approximately 76 lights are planned to be installed along 89A starting in 2010. 3 public meetings will be held. **SR 179** project is on schedule.

**Cottonwood**-The Willard St extension is in progress. South 12<sup>th</sup> Street will be improved. Mingus Ave will be reconstructed from 89A to Willard St.
